

I am outraged to hear that the NAB has a petition to stop XM from providing XM Instant Traffic and Weather. This service is always up to day and is so much superior to local traffic updates. I have switched between the two often and by far, XM always is more up-to-date and more comprehensive. It includes so much more. It is also very thorough with the weather forecast. Plus, you know there is one place you can go where there is always going to be traffic or weather. The location stations around here, one in particular that has updates on the 8's is wonderful - i love it for the news. But after experianceing the awful traffic in this area - XM is far superior. It is up to date all the time. Please don't take this away from XM. It is a service XM subscribers pay for. Shouldn't we have a say in what we want?? Why should the NAB get to decide what we listen to on XM simply because they feel threatend? Please reject the NAB's petition 04-160!

Thank you.
